A Festive Celebration: Uniting People from Around the World

(North York, Toronto)—From Ireland to China, families from all over the globe are joining Health in Motion Rehabilitation to partake in their 3rd annual Christmas Holiday celebration. Patients from Asia, Africa, and Europe will be joining Health in Motion on November 30th, 2011 from 7:00-9:00pm for an evening of good food, great laughs, and new friends. Health in Motion's determination to bring one's child to independence has enticed patients to travel the globe for their unique intensive treatment program called LIFE (Learning Independent Function for Everyday). Health in Motion wishes to celebrate their patients' achievements by inviting the community to get together and celebrate the holiday season.

Health in Motion is a Toronto-based rehabilitation clinic that provides specialized treatments for children and adults with cerebral palsy, developmental delay, acquired brain injury, paediatric stroke and Down syndrome. Natan Gendelman, an Osteopathy Manual Practitioner and Kinesiologist founded the clinic in 2001 with the belief that everyone is 'abled' and no one is 'disabled'. Natan Gendelman, considered by many to be a leader in his expertise, envisioned The LIFE program, and started this innovative child treatment program to address current issues with dependency and provide hope for families. Health in Motion believes that each person should have the same chance to live an independent and self-sufficient life.

This event is open to the public. Please join Health in Motion Rehabilitation to celebrate the holiday season. Health in Motion is located at 4256 Bathurst Street, Suite 204, Toronto, ON. For more information about the clinic and/or the upcoming holiday party, please visit www.healthinmotionrehab.com.
